
Announcing EHS Insight, Your New Solution for Safety Inspections beginning July 1

In an effort to improve upon the current safety inspection program, the Risk Management & Safety (RMS) team is excited to announce EHS Insight as the campus' safety inspection platform effective **Friday, July 1**.

Designed to make inspection processes more efficient and user-friendly, EHS Insight will be used for conducting and documenting campus safety inspections. This new tool allows you to:

- Complete assessment reports from anywhere (includes a free mobile application for your mobile device)
- Track items to completion for your laboratory, shop, building, department and work areas
- Access essential data from assessments

Helpful resources such as quick reference guides, knowledge based articles, and FAQs can be found by visiting the [Risk Management & Safety Website](#), or searching for and clicking the “EHS Insight” task in [InsideND](#).

The RMS team will be hosting additional training sessions in August. More information will follow as it becomes available.

Thank you for helping the RMS team improve the safety inspection system, and for your continued support. If you have any questions, or need assistance working within the system, please contact inspect@nd.edu.
