

IMAGINE_{PHD} DEMO & SMART GOALS SETTING WORKSHOP

THURSDAY, APRIL 6 | 12 - 1 PM | 512 DUNCAN STUDENT CENTER | *LUNCH WILL BE PROVIDED*

One of the biggest barriers to finding a career is getting started in the process. Join us for an interactive demo of **ImaginePhD**, a service designed to help humanists, artists, social scientists, and professional master's students get started in career exploration, discernment, and personal discovery. Students are encouraged to bring their computers to follow along. After demonstrating the platform, the workshop will continue aiding students as they begin crafting short, middle, and long-term SMART goals. Students will leave the workshop with the ability to successfully navigate ImaginePhD independently and with an action plan driven by their smart goals that will organize students for further career development independently and in conversation with GCS.
